- 2) Coal has to be transported to and loaded from a siding which is preferably a private siding (PFT) / Goodshed commercially notified for out-ward movement of coal which is operational for the last 6 six months for coal rake loading. The siding should **preferably have low pendency of rake allotments**.
- 3) Obtaining necessary mining clearance if required and issuance of Road Delivery Order.
- 4) All statutory returns pertaining to District Mining officer should be submitted by the service provider on behalf of CESC Ltd.
- 5) The bidder will be responsible for indenting, timely placement, dispatch & delivery of railway rakes to BBGS, such that the desired Dispatch Schedule as communicated by CESC from time to time **is maintained. Railway Freight for the rakes will be paid by CESC Ltd.**
- 6) The bidder shall pay the WRF charge while placing indent for a rake. If the same is adjusted in the Railway Freight, then the bidder shall raise a debit note to CESC Ltd for re-imbursment of the WRF charge. If it is not adjusted in the Railway Freight then the bidder shall make arrangement with the Railway for refund of the same.
- 7) The bidder shall ensure, all railway wagons are healthy and are of BOBR/ BOXN type only.
- 8) The bidder shall supervise the loading and ensure proper quantity and quality loading matching with grades declared by NLCIL and Coal free from Shale/Stone, Big size boulders and other foreign ingredients. **The size of coal loaded on to Rakes should be -100 mm.**
- 9) The bidder should ensure that coal is stored **in a proper manner in the Good shed/ siding** in identifiable stacks and also ensure to protect it from fire, submergence during rain or theft.
- 10) The bidder shall collect the Coal invoices, other documents from NLCIL, RRs and associated documents immediately and forward the same to our office at Kolkata. Similarly, the bidder will also take up with NLCIL for obtaining refund against amounts due to us for various reasons from time to time.
- 11) **The bidder will be responsible for getting EDRM approval from Railways for placement of Indent and supply of rakes to BBGS.**
- 12) The Bidder shall be required to load remnant coal if any from the same siding from the previous D.O. quantity, if available. This should be loaded in separate identifiable wagons of the rakes.
- 13) E-way bill for transportation of coal by road / rail mode have to be submitted by the bidder

- 14) Apart from the services indicated above, any other services, if required shall be provided by the bidder to ensure that the desired quality and quantity of Coal reaches the project site.

G. QUANTITY

The Colliery, grade and total quantity are as follows:

Source (Colliery and Grade), size	Quantity (MT)
TALABIRA II & III OCP (G14), (-100 mm)	28,000

The quantity of coal to be handled may vary by +/- 10%

H. PERIOD OF DELIVERY

The tentative period of delivery of coal from the above sources is for October to December, 2025 or completion of Delivery Order.

I. COMMERCIAL CONDITIONS

Note: All computations, including penalties, will be based on the Actual Receipt at Station

1. Service Charges on account of quality assurance:

Quality of coal shall be based on **GCV Eq** (Equilibrated at 40° C and 60% RH) of the total supplied quantity from a particular source (Colliery and Grade).

Quality Commitment is for supply coal in Billing Grade. (For example, for G-14 Grade, the minimum GCV Eq has to be 3101 Kcal/Kg)

Coal of billed grade has to be guaranteed **for the total supplied quantity for a particular Sale / Delivery Order.**

- An independent inspection agency (IIA) shall be appointed for collection and preparation of coal sample at unloading point of CESC.
- The samples collected at unloading point shall be analyzed at CESC's Laboratory for GCV Eq & TM and **this result shall be considered** for ascertainment of service charges for quality.
- Any deviation of coal quality parameter i.e. from analysis report of plant end sample will attract suitable reduction in service charge.
- The Contractor may depute their representative at plant end for witnessing unloading and sample collection/preparation.

Following GCV penalty will be applicable on transportation and handling charge:

For GCV received below billed grade as per analysis report, **pro-rate penalty on landed cost of coal at CESC plant will be applicable.** Landed Cost is inclusive of Coal Value, Rail Freight, Road Freight, Handling and other related charges.

2. Service Charges on account of transit weight loss:

Transit weight loss from a particular source/colliery to a particular Generating Station will be calculated as the difference between the

Aggregate Weight of the Lifted Quantity (as per NLCIL's record) and the Aggregate Receipt weight (corrected for TM) as recorded in the electronic weigh bridges at our generating station. (DO wise)

Tolerance of 0.3% shall be allowed.

In case, there is any variation beyond the permissible limit of 0.3% in the quantity of coal transported as per the weighment at the loading end (NLCIL) Weigh Bridge and CESC plant weighment, the recovery for such short fall shall be made at the rate of **the price of Coal inclusive of all taxes paid to the coal company**, from the bills of the bidder.

Weighment at plant weighbridge will be witnessed and endorsed by your representative. In case of any disagreement with regard to the plant received weight, your representative shall immediately note and inform CESC representative. However, in case of dispute, decision of CESC shall be final and binding in this matter. In the event your representative does not witness the weighment at plant end, the **Plant Received Weight (corrected for TM) shall be final for all commercial purposes.** (Refer to pt no 3)

When due to any reason Plant received weight is not available, RR net weight shall be considered for all commercial purposes

3. Correction of received weight for Total Moisture (TM):

TM of received coal shall be measured after sampling as detailed in "Quality Analysis". Allowable maximum TM for Talabira coal is **14.0%**.

Illustration:

Received weight of coal in a rake = 'W1'

TM of received coal = 'M%'

Allowable TM % (for Talabira coal) = **14%**

If $M > 14\%$, then, TM adjusted weight $W2 = W1 \times \{1 - (M\% - 14\%)\}$

If $M \leq 14\%$, then, TM adjusted weight $W2 = W1$

Weight W2, called the 'TM corrected Receipt weight', shall be considered for all commercial computation.

4. Penal Overload/ Underload / Demurrage:

The bidder engaged for loading the Railway Wagon shall also ensure that wagons are loaded as per their capacity and no overloading and under loading is done. The loading of wagons should be done under strict supervision of the bidder, who will ensure that no overloading and under loading is done.

Penalty for Overloading: Penal Overload after allowing normal freight for the overloaded quantity will be deducted from the bill of the concerned agency / bidder.

Penalty for under loading: Any idle freight due to under loading of wagons incurred by CESC, if any, shall be deducted from the bill of the concerned agency / bidder.

The Underload figures will be calculated after considering the net underload effect for the billing period after considering both negative and positive values.

UL Tonne per Rake = Aggregate Permissible Carrying Capacity (PCC) – Plant received weight (corrected for TM) of the rake.

Idle freight shall be calculated as above on aggregate basis from a particular source **for a particular Sale / Delivery Order.**

The bidder shall ensure that there is no detention of wagons at the railway siding due to failure of transportation of sufficient quantity of coal to the siding and in case of such failure the bidder shall be held responsible and demurrage if any, paid by CESC **shall be recovered from the bidder's bill / dues / security deposit.**

Similarly, **PCLA & other related charges** levied by Railway on account of load adjustment en-route due to overloading will be on the account of the bidder.

5. Penalty for failure to lift coal within due date of DO:

For delay in lifting of coal within the due date of a particular DO leading to forfeiture of EMD paid by CESC to the coal company, the sum will be deducted from the bill of the bidder.

6. Penalty for Demurrage charge at unloading end due to oversized / sticky coal:

The bidder shall be liable to bear demurrage charge on account of oversized (> 250 mm) coal / stone / boulders, mud, sticky coal or other foreign materials as reported by Generating Station. Joint inspection of unloading shall be carried out between the representatives of the bidder and Generating Station. The quantum of demurrage as certified by the Generating Station / billed by Railways shall be deducted from the bill of the bidder.

For Other Commercial Terms and Conditions refer to **Annexure I.**

J. PAYMENT TERMS

Bills shall be raised monthly for a particular source and grade to a particular Generating Station, till completion of supply for the contracted quantity **(based on TM corrected Station received weight)** or as decided by mutual agreement. Bill value will be computed on aggregate basis of quality, demurrage charges, underload and overload charges.

Deduction on account of transit weight loss and penalty for failure to lift coal within due date of DO, if any, shall be reconciled at the end of the delivery period for the contracted quantity.

- IV) Changes in applicable laws.
- V) Force Majeure events which occur outside India and do not directly involve India comprising act of war (whether declared or undeclared), invasion armed conflict or act of foreign enemy blockage, embargo, resolution, riot, insurrection, civil commotion, act of terrorism, or politically motivated sabotage or kidnapping or any event or circumstance of a nature analogous to any of the foregoing.

If the Contract is delayed or impeded in the execution of the work by circumstances of Force Majeure as herein defined, then the Service provider/ Owner as the case may be, shall within one week, give notice in writing to the Owner/ Service provider, of the existence of circumstances of Force Majeure, together with the evidence relied upon.

Burden of Proof: In the event that the Parties are unable in good faith to agree that a Force Majeure Event has occurred, the parties shall submit the dispute to arbitration, provided that the burden of proof as to whether a force Majeure event has occurred shall be upon the Party claiming a Force Majeure Event.

Effect of Force Majeure: Neither party shall be considered to be in default or in breach of his obligations under the Contract to the extent that performance of such obligations is prevented by any circumstances of Force Majeure, which arise after the Date of Contract
In the event that Force Majeure circumstances continue for a period of more than six (or any other period as Parties may agree) months, both the parties may discuss and mutually agree upon the future course of action, which may include termination of Contract.

Performance to continue: Upon the occurrence of any circumstances of any Force Majeure the Service provider shall endeavor to continue to perform his obligations under the Contract so far as reasonably practicable. The Service provider shall notify the Engineer of the steps he proposes to take including any reasonable alternative means for performance, which is not prevented by Force Majeure. The Service provider shall not take any such steps unless directed so to do by the Engineer.
