

CESC Limited
Product Stewardship Policy

CESC Limited (‘CESC’, ‘the Company’) understands that every input material or product that it sources whether in raw, fresh, semi-processed, or finished form and packaging materials have far reaching environmental and social impacts throughout all life cycle stages whether in production, use or at end-of-life.

The Company recognizes its responsibility towards product stewardship and reducing impacts whilst maximizing economic benefits. Accordingly, the Company seeks to ensure that those who design, manufacture, transport, retail and use our products take responsibility to reduce negative impacts to the environment, economy, public health & safety, human rights, and worker health & safety.

The Company and its value chain members shall endeavour to:

- comply with legislative requirements related to product safety, quality, public health and environment as applicable;
- use resource-efficient and low-carbon processes and technologies to minimize adverse environmental and social impacts;
- engage with and sensitize stakeholders across value chain on the environmental and social issues and impacts across product life cycle from design to disposal and their responsibility;
- work with experts and value chain members to identify existing and potential environment, health and safety risks and inherent hazards of materials used in production and in disposal;
- design for the environment and consider the end-of-life impacts of products and packaging during the earliest stages of design. Redesign as reasonably practical and manage end of life disposal and recovery challenges;
- safely collect, reuse, and recycle their products at end of life as a part of extended producer responsibility where applicable;
