

Don't invite **Danger** This rainy season

AT HOME

- Periodically check house wiring and switches – replace old and frayed wires.
- Never touch electrical switches and appliances with wet hands.
- Never use mobile phones while charging.
- Do not neglect any indication of smell / mild shock from electrical switches / appliances. Switch off – call an electrician.
- If you cannot identify the source of an electrical shock, turn off the main switch. Inform CESC at Helpline Number 1912.
- During heavy rains and lightning, switch off electrical appliances and unplug them from the wall socket.
- Avoid touching dangling conductors or wires.
- Do not spread out wet clothes on or near overhead lines.
- Avoid using extension wires on metallic grilles / windows.

OUT OF HOME

- During rains, avoid close proximity to electrical poles, stray wires or distribution box / kiosk.
- Do not touch loose / bare wires and electrical equipment – it is dangerous.
- Barricade waterlogged areas if they seem to be electrified.
- At the workplace, do not forget to switch off ACs or other electrical equipment when not in use.
